## SPRAYEX60XR

The smallest self-contained machine with a rotating brush, the SPRAYEX60XR is designed for professional cleaning of small areas of carpet and hard-floor. Small, robust and very effective, ideal for areas up to 150-200 sqm.

Designed for professional cleaning of small areas of carpet and hard floor, its small width (29 cm) allows the machine to be used also in very confined spaces. SPRAYEX60XR is perfect for the hiring to private users thanks to its strength and its ease of use. Its professional features also make SPRAYEX60XR suitable also for cleaning companies.

The mechanical action of the cylindrical rotating brush allows dirt to be removed from the carpet down to the base of the fibers. Even very dirty carpets are thoroughly cleaned in a single pass.

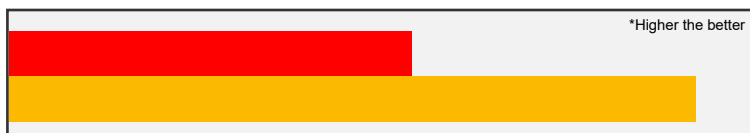

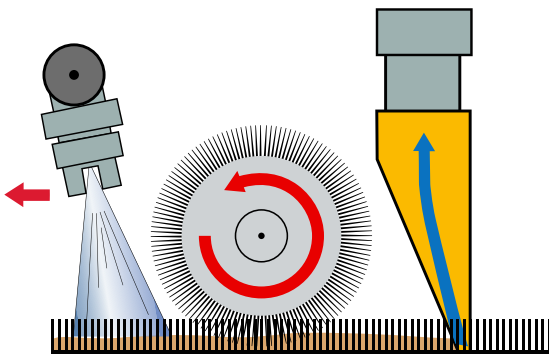

The high-waterlift vacuum system makes it possible to completely remove detached dirt from the fibers and leave the carpet nearly dry.

Even in the case of deep cleaning, the drying time is very short and the carpet is walkable again after about 1-2 hours.

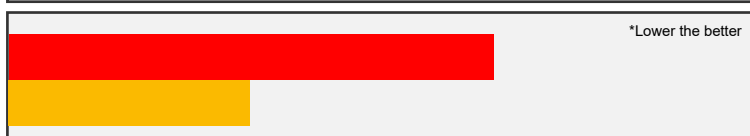

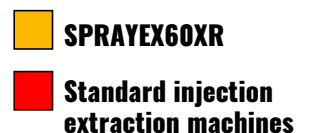

By turning a lever, the flow rate of water sprayed can be reduced to perform a maintenance cleaning. In this case, the carpet can be dry in about 30 minutes.

A special device makes it possible to switch from carpet cleaning to hard floor cleaning by simply turning a lever.

**MAIN APPLICATIONS:** Cleaning companies, hotels, restaurants, clubs, pubs, offices, banks, shops, rental companies, private houses, carpet shops, trains, busses, planes, cinemas, theatres, ferry boats, ships, hospitals, nursing homes, fitness centres, schools, universities.

**Waterlift**

**Drying time**

**Residual dirt**

## ADVANTAGES OF THE SPRAYEX60XR:

---

1. Reduced width (only 29 cm) for professional cleaning even of small surfaces of carpet and hard floor.
2. The High-waterlift vacuum system allows an incomparable dirt removal and a very short drying time.
3. The machine is light and easy to carry.
4. Water spraying can be operated simply turning the handle of the machine.
5. It is possible to clean both carpet and hard floor with a single machine. The shift from carpet to hard floor cleaning and back is done easily by turning the lever on the vacuum head.
6. Possibility to push the machine forward on hard floor without lifting the vacuum head thanks to proper support wheels.
7. Powerful and reliable brush motor which allows a strong brushing action.
8. Automatic adjustment system of the rotating brush pressure according to the kind of carpet.
9. Brush easily replaceable with no need of turning the machine over.
10. Vacuum head in die-cast aluminium, practically indestructible.
11. Special profile of the vacuum head, which allows a shorter drying time.
12. The height of the handle is adjustable so that it can be regulated according to the stature of the worker.
13. Quick disconnect spray nozzles, which can be replaced by hand: the nozzles can be cleaned easily and without using any tool.
14. The hand tool **VTVS7016**, supplied as standard, allows to clean hard-to-reach corners.

## **OTHER TECHNICAL ADVANTAGES OF SPRAYEX60XR:**

---

1. High density polyethylene tanks, very strong and made for lasting a long time.
2. Transparent unbreakable cover, which allows to see the dirt while vacuuming.
3. Recovery tank easily detachable from the machine body, in order to make the tank emptying and cleaning easier.
4. Easily accessible hole for clean water filling
5. The filters of the vacuum motor are easy to reach and removable for an easy cleaning.
6. The gasket are not glued and replaceable by hand. Easy to clean and change.
7. Strong wheels, in antimark rubber.
8. Brass quick-disconnect couplings, reliable and strong.
9. Water pump with bypass, which allows the automatic regulation of the optimal water lift according to the tool used. Moreover, the bypass device makes the pump more reliable and avoids problems in the years.
10. Pump built on V-TUF's specifications, for lasting long.
11. Vacuum motor with thermal protection against overload.
12. Vacuum motor treated against rust.
13. Both motor and pump can work continuously.
14. Brush motor with thermal protection against overload.
15. Stainless steel brush bearings for a longer life.
16. Modular design that makes the maintenance easier. It can be done at low costs.

## TECHNICAL DATA

ITEM	SPRAYEX60XR
Approximate performance	50-120 m <sup>2</sup> /h
Recovery tank capacity	14L
Solution tank capacity	14L
<b>Vacuum motor:</b>	2 stages – High Waterlift
Power	1500 W
Max. waterlift (mm H2O)	3000 mm H2O
Max. air flow (l/sec.)	45 l/sec
<b>Pump with bypass:</b>	vibrating
Power	70 W
Max pressure	4 bar
Max. water flow	1,5 l/min
Cleaning width (carpet/hard floor)	270/290 mm
Number of nozzles	3
Adjustable waterflow	Yes
Rotating brush	120 W, 600 rpm, 232 mm
Cable length	10 m
Hose length	2,5 m
Weight (machine body)	24 kg
Weight (packaged machine)	27 kg
Dimensions	cm 29 x 78 x 90 h
Package dimensions	cm 36 x 60 x 80 h
Units/pallet	8 pcs/ pallet (cm 80 x 120 x 173 h)
Standard color	Blue
Tank construction	High density polyethylene
Sound pressure level (3m/1m - ISO3744)	69 dB(A) / 75 dB(A)
Power supply	Cable - 220-240V 50-60Hz (other voltages on request)

**\*The effective performance depends on the type of cleaning required:  
restorative deep cleaning - maintenance cleaning.**
