

To ensure your warranty is valid, make sure that your V-TUF product is safety inspected and serviced, at least every 6 months. Please note: Safety testing and servicing is chargeable, and warranty cannot be honoured if you cannot produce a copy of this maintenance log with your service history.

Many product failures, loses and injuries are due to a lack of routine safety testing and routine maintenance, and these faults are not covered by warranty.

The maintenance log must be signed off by an engineer endorsed by Fenco Group Ltd t/a V-TUF.

If you have any questions or queries, please email enquiries@v-tuf.com

ii you have any questions or queries, prease emait <u>enquinestev-rui.com</u>
